MONEY, STOCKS AND GRAIN

Prices Were Tending Downward at the Close on the New York Exchange.

Western Business Troubles Had a Depressing Effect on the Market-More Active Trading in Cereals at Indianapolis.

NEW YORK STOCK MARKET. Prices Higher at the Opening, but Weak and Lower at the Close,

Money on call at New York, Saturday, was nominally 5 per cent. Prime mercantile paper, 6@10 per cent. Sterling exchange was quiet but firm, with actual business in bankers' bills at \$4.82@4.8214 for sixty days, and \$4.84@4.8414

for demand. Silver certificates were weaker, with sales at 78.

In reviewing last week's operations in Wall street, the reporter for the press associations says that the incidents of the week bave shown with unusual force how closely, in these days, the world's financial markets are bound together. In Capel and in Wall street the week's experiences have been identical both as to time and character. A difference has existed in the fact that while New York has gathered encouragement from the increasing signs of a movement of foreign gold in this direction, London has regarded with some apprehension the drain on its reserves. It is, however, bardly possible that a steady improvement In the American markets should not fat more than offset in London the incident of a heavy specie export. In point of fact, the bank of England's gold balance has for a fortnight been larger in amount than at Bny period in the last fifteen years.

In Saturday's market higher prices were recorded at the opening of business at the Stock Exchange, an advance of 's to 's per cent. having been established in face of lower cables from London. The Kansas bank trouble and the attachment of the Echlessinger mine property soon caused a change of sentiment, and the early gain was not only lost but a net decline of 4 to a per cent. was the record for the day. The bank statement, with its gain in reserve, the first increase reported since May 27, last, checked the decline for a time, the price fell to 61%. No special reason was assigned for the selling. General Electric also lacked support and fell from 65% to 62%, closing at 62%. Among the grangers Northwest was nominally weak on the Schlessinger embarrassment. The common, after a fractional advance to 1014. fell to 98%, and left off at 100. The market closed weak. The sales of stocks were 76 .-883 chares.

Rasiroad bonds were dull and firmer. The sales were \$334,000. Peoria & Eastern firsts fell 2, to 65. Government bonds were steady, while State bonds were dull. Clos-

ing quotations were: Four per cent. reg. 111 | Lous. & Nash..... 5734 | Four per ct. coup. 111 | L. & New Albany... 1512 | Pacific 6's of '95 ... 10312 | Missouri Pacific.... 2958 Atehison. 20 N. J. Central 100 Acams Express 145 Northern Pacific. 11 Alton & T. H. 29 N. Pacific pref. 2978 Alton & T. H. pref. 145 Northwestern 100 American Expr'ss.108 Northwest'rn pr'f135

The weekly statement of the New York associated banks shows the following

The banks are now \$4,264,100 below the requirements of the twenty-five-per-cent.

LOCAL GRAIN AND PRODUCE. Trade in Most Departments the Past Week

Quiet, with Few Fluctuations in Values. On the wholesale streets, with but few exceptions, merchants report trade quiet. Especially is this true with dry-goods houses, boot and shoe men, confectioners and druggists. Grocers are having a good trade. The tendency to an advance in many of the staple articles is stimulating trade. On commission row business seldom reaches such a volume in the summer months. The receipts of small fruits, apples, plums and peaches are large. The demand is active and prices are well held. The last day or two there has been a surplus of tomatoes, and much of the stock poor in quality. But few peaches are coming in of near-by growth. California peaches and pears are in good supply, pears

and prices this late in July are very firm. Still higher prices are talked of. The local grain market shows more activity than a few weeks ago, but the movement of wheat is by no means up to that of former years in July. Indianapolis elevators on Saturday contained 66,372 bushels of wheat, against 54,200 bushels for the corresponding date in 1892; 21,000 bushels of corn, against 5,000 bushels last Year: 18,000 bushels of oats, against 17,000 bushels last year. Bids of the several cereals on Saturday ruled as follows: Wheat-No. 2 red, 60c f. o. b; No. 3 red.

being but \$3 per bushel box. !rish pota-

toes are not as plenty as they should be,

Wheat Closed Lower at Chicago Despite All the News Was Bullish.

Speculators Used Reports of Business Troubles to Depress the Market-Exports Unusually Heavy-Large Sales of Ribs.

TRADING AT CHICAGO.

Wheat Went Off Nearly Half a Cent-Provisions Also Forced Down in Price. CHICAGO, July 15 .- Wheat was weaker to-day in spite of the heavy exports, the bad crop outlook and the steady to firm cables. The weakening factor was the list of bank suspensions and business failures. This was more than sufficient to offset the more fayorable news in the way of poor crop prospects, and after a moderate display of firmness there was a gradual decline of nearly be, with a subsequent slow and uncertain rally. In some respects the conditions were unusually favorable. The exports from both coasts for the week were 4,125,000 bushels in wheat and flour, the largest, it is said, with four exceptions, ever made in one week in the history of our export trade. It shows the foreign demand to be on a gigantic scale, but with little fuss or noise, as though buyers were quietly picking up all they could get. Fluotustions were confined within sc range, and the closing was about 3sc lower for July. 4e lower for September, and 4se lower for

In corn there was light trading and the fluctuations were limited to 4c range. The close showed little change from yesterday. Local operations were inclined to seil at the start, owing to the financial troubles in the Sothwest, but the offerings were readily taken by commission concerns. Though showers were reported over the West, more southern Kansas and the central portions of this State. Receipts, while liberal, were not nearly as large as predicted. Offerings of oats were light. Prices ad-

December than the closing figures of yes-

terday.

vanced 40 for July from yesterday's close. September advanced 4c and closed steady. Receipts were less than expected. A leature of the provision market is the fact that the new speculative products are not being traded in, which is quite unusual at this season of the year. "Charley" Wright was an open seller of ribs. His sales for the last few days, it was reported, would probably aggregate 4,000 .-600 lbs. Lard received the lion's share of attention. It was sold by the packers, and, after being bid up . 20c by Cudaby brokers, declined .2742c from top prices. At the close, compared with last night, lard showed a decline of .05c for September and .274c for October. Ribs are .25@.274c off.

Freights were slow, with light offerings of vessel room. Agents asked 140 for wheat and corn to Buffalo. Estimated receipts for Monday: Wheat, 143 cars; corn, 500 cars; oats, 190 cars; hogs, 27,000. The leading futures ranged as follows: 10 1 1 11 1 11 1 1 1 1 1 1

Pork closed with an advance of 15c, but

with scarcely any business done in it.

Sweet or Sour Cream? Bulletin No. 18 of the lowa experiment station contains the tabulated results of nine trials of cream between Jan. 13 and April 8, 1892, Each batch of cream was divided into equal portions. One-half was ripened and churned at 58° to 60°; the other half was churned sweet, at a temperature of 50° to 54°. It the latter temperature had been even lower the results might have been better. Two following were the me-

chanical results "The yield of utter from sour cream was usually larger than from sweet. In nine trials it averaged 3 per cent. larger. "Sour cream usually churned quicker

"The butter from sour cream usually contained less fat and more water than did that from sweet cream. In four trials the average difference in fat was nearly 2 per "The butter from sour cream usually con-

tained a tritle more casein than did that

from sweet. This was the case in eight of

the nine trials made. The average difference was two-tenths of 1 per cent. "The losses of fat in churning, washing and working are less with sour than with sweet cream. In pine trials the average difference was nearly one-half pound of fat per one hundred pounds of butter made. This difference was sufficient to make the loss about 50 per cent, greater in churning sweet than in churning sour cream."
Sweet cream butter has a delicate flavor peculiar to itself which is much enjoyed by epicures, but which is not appreciated by the general trade. This aroma, or bouquet. will in a measure come to sweet cream but-

ter with time, doubtless due to the action of the bacteria, which is much slower in the mass of butter with its relatively small amount of nitrogenous matter. On this account sweet cream butter suffered less deterioration by keeping five months (at a temperature of about 50°) than did the sour cream product. The former acquired in a measure the flavor and aroma of ripened cream butter. The first changes of the sweet cream product were those of ripening and developing the flavor, while the sour cream butter is "dead ripe," so to speak, and its first changes are those of deterioration.

Spraying Potatoes. Hartford Courant

At the Vermont station, last season, potatoes that were sprayed with Bordeaux mixture yielded 322 bushels of merchantable potatoes, while those not treated yielded only 102 per sere. The spraying was done only three times-July 30, Aug. 18, and again on the 25th. The unsprayed plots were all dead the middle of August. Those sprayed were perfeetly green and vigorous up to the middle of September, and some of the vines were green until killed by frost in October. The mixture consists of five pounds of blue vitriol dissolved in a wooden or brass kettle and five pounds of fresh time slaked and diluted to a whitewash. These two solutions are then strained into a clean barrel. Add fifty gallons of water and mix thoroughly. The mixture can be applied with a watering pot or pail and brush broom, but it is cheaper and better to use a spraying pump. Paris green can be added to the mixture in order to fight bugs at the same time. The application prevents rot as well as other evils which the potato is heir to.

To Prevent Choking.

When a cow or any other animal becomes choked it tries to remove the obstruction by swallowing, and in so doing forces air past the obstruction, which acts like the valve of a pump, and not infrequently death ensues from bloating. To prevent this take a piece of wood some two inches or more in diameter and fasten it in the animal's month like a bit. This ar rangement will prevent the closing of the mouth and hence put a stop to swallowing. Let the stick remain in the animal's mouth for an hour or two, when it will generally be found that the obstruction, if an article of food, has been sufficiently softened and reduced in size by the action of the digestive juices to pass readily into the stomach.

Never pull off your gloves by the finger tips, but by the wrists, turning them thus inside out. Let them air for a few minutes before turning them again, and do not roll them up into a wad; let them lie at full THE

INDIANAPOLIS JOURNAL

DAILY.

SUNDAY

AND

WEEKLY

The Journal's price for daily is only 15 cents a week, and it has a very wide circulation, reaching a large number of people hitherto unable to afford the luxury of a first-class daily paper. Reports from agents and subscribers indicate a continued increase, and that what used to be regarded as a luxury has become a necessity. The new readers not only remain, but they are constantly increasing.

It is the purpose of the Journal to make itself even more indispensable to its patrons, new and old, and to still further widen its field. To this end it will not only endeavor to maintain the characteristics which have established its reputation as by far the best newspaper in Indiana, but will add such new features and improvements from time to time as are in accord with journalistic progress and that may tend to the advantage of its readers. It will, for example, give increased attention to State and local interests. What Indianians want is a paper in which Indiana affairs are given especial prominence and importance. This want the Journal has always supplied as no other paper published outside or inside the State is able to do; but the rapidly developing industries and business and social enterprises of the community call for additional consideration and space, With this in view its corps of correspondents has been increased until it has a representative in nearly every town in the State. Special traveling correspondents will visit the news centers of the State at frequent intervals, thus insuring the "write up" of every important event or matter of general interest.

Being published in the geographical center of Indiana the Journal is afforded unusual facilities for securing news promptly, and, what is of greater consequence, is able to reach its subscribers without delay. The running of morning trains from Indianapolis is very favorable to the early distribution of papers sent by mail or express, and in most towns within a radius of a hundred miles Journals are delivered as early as in the city where they are printed. In the more remote counties there is but little loss of time in transportation.

The Journal is the paper for Indianians and particularly for Indiana Republicans. The change of administration involves the settlement of political problems likely to be of the most direct personal concern to every farmer and business man in the State. All such matters will be set forth in detail, the Journal's Washington correspondent being instructed to give especial attention to everything having a possible bearing on Indiana interests.

But though the Journal is Republican in politics it is non-partisan in the publication of news. Its constantendeavor is to secure facts unbiased by prejudice and to make its columns trustworthy records of each day's happenings. A large editorial force supplements the work of the press associations and the correspondents, and furnishes careful supervision for each department.

The Sunday Journal has a well-established literary character, superior to that of any Western paper. It is not defaced by "plate matter" nor filled with a heterogeneous mass of syndicate literature, but its contributions and miscellany are chosen with a view to their special fitness and adaptability to the tastes of the readers. The reading matter in any given number of the Sunday Journal is equal in quantity and is not inferior in quality to that found in the leading magazines. As an educational adjunct and a source of entertainment the Sunday Journal is indispensable in every well-regulated family.

The Weekly Journal, at \$1 per year, contains more reading matter than can be obtained for the money in any other shape. It is carefully edited and offers the news of the week in condensed shape and a variety of miscellany, agricultural and household literature that render it one of the best investments that any family can make. Try it and see. It has a large circulation in this and other States and agents find it an easy matter to secure large lists of subscribers. Special inducements offered to agents. Circulars sent on appli-
